Clik Cert Certificate Packs

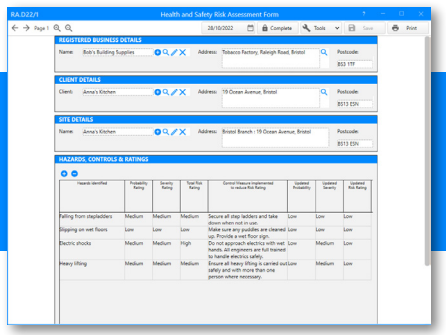
clik cert

With Clik Cert, you can **select which certificates you want to view and fill out** by choosing and purchasing cert packs. Packs are split into different industry categories.

Have a look to see which certificates are available in each pack.

Workplace Safety

- Safe to Work Checklist
- Health and Safety Risk Assessment Form
- Danger Do Not Use – Warning Notice



Bespoke

Our design team can create bespoke certificates on request for custom work and forms for your business (charges apply).

If you've got an existing design you'd like us to recreate, we have a fully customisable designer that will allow us to recreate **any cert type you can imagine**.

Add your logos for brand recognition and edit fields on existing certificates to suit your business. Or request entirely new forms to use in your software and onsite.

How does it work?

1. Inspiration

Send us an example of a certificate you want us to recreate or design. We'll then send through a quote for the work.

2. Collaboration

After you've placed your order we'll send through a first draft of your design. We'll then work together to finalise your new cert.

3. Completion

Once you're happy with the form and edits have been made, we'll set it up in your system so you and your team can start using it.
